Dr Milan Nedeljković je član je Srpskog Lekarskog Društva, Udruženja Kardiologa Srbije, Evropskog kardiološkog društva, Evropske asocijacije za perkutane koronarne intervencije u okviru Evropskog kardiološkog društva, Američkog Udruženja Kardiologa.

**D. OCENA O REZULTATIMA NAUČNOG I ISTRAŽIVAČKOG RADA**

Dr Milan Nedeljković, je tokom svog dugogodišnjeg rada imao niz istaknutih naucnih publikacija iz oblasti kardiologije koje su objavovane u eminentnim naučnim casopisima sa velikim brojem citata i impakt faktorom. Ukupno ima objavljeno 708 naucnih publikacija u celini i to: 29 članaka u časopisima sa SCI ili CC liste, 8 članaka objavljenim u časopisima indeksiranim na Medline bazi podataka, 60 radova objavljenih u celini na međunarodnim skupovima, 48 radova objavljenih u celini na nacionalnim skupovima, 292 izvoda na međunarodnim skupovima i 244 na skupovima od nacionalnog značaja, kao i 16 članaka u monografijama, dok je sa 11 članaka doprineo publikovanju knjiga i udžbenika.

U svojim prvim naučnim koracima, kao saradnik, koautor, zajedno sa kolegama iz Kliničkog centra Srbije, objavio je niz radova počev od 1994. do 2000. godine koji su se pretežno bavili ispitivanjem neinvazivnih metoda detekcije miokardne ishemije.

U nizu publikacija, koje su objavljenje u najprestižnijim casopisima, kao sto su žurnali Američke Asocijacije Kardiologa i Američke Medicinske Asocijacije (JACC i Circulation), a takođe i žurnalu Evropskog Udruženja Kardiologa (EHJ), profesor Nedeljković je ostavio

značajan naučni trag koji je omogućio dalji razvoj same kliničke kardiološke prakse pre svega na našim prostorima, a takođe i u svetu. U 7 radova profesor Nedeljković je prvi autor, i ti radovi se pretežno bave tematikom kojom je i stekao doktorsko zvanje na Beogradskom Fakultetu, a to je detekcija i tretman koronarnog vazospazma kako neinvazivnim tako i invazivnim tehnikama. U radovima koje je objavio u periodu od 2000. do 2007., istakao je značaj ovog fenomena na kliničku prezentaciju kod bolesnika sa sindromom bola u grudima, kao i potencijalne mogućnosti njegovog invazivnog tretmana, što je i publikovano u časopisima kao što su Herz i žurnalima invazivne kardiologije i vizuelizacionih tehnika (J Inv Cardiol i Nucl Med Commun). Takođe, njegov rad na inovacijama i novim tehnikama i vizualizacionim metodama detekcije miokardne ishemije, je kulminirao sa nizom članaka gde je kao koautor bio član tima, baveći se pre svega ishemijskim promenama oštećenog miokarda, koronarnom fiziologijom (Eur Heart J) i kolateralnom cirkulacijom (Int J Cardiovasc Imaging) kod pacijenata nakon infarkta miokarda (N Med Comun). Takođe, kao jedan od glavnih organizatora i direktora kursa za interventnu kardiologiju, BASICS plus, imao je priliku da publikuje i predstavi najnovije tehnike i sredstva koji se koriste u lečenju najtežih pacijenata sa potpunim zapašenjima koronarnih arterija, a koje su po prvi put prezentovane našoj i međunarodnoj stručnoj publici na ovom seminaru (Herz). Na polju interventne kardiologije, najznačajniji je njegov rad u pogledu istraživanja novih stentova sa lekom i farmakokinetike leka za prevenciju restenoze (Catheter Cardiovasc Interv i Eur J Clin Pharmacol) i samog procesa restenoze. Ceo njegov rad na području kardiologije je bio prepoznat i od strane međunarodne stručne javnosti, te je tako profesor Nedeljković imao čast i priliku da u tri članka-intervjua predstavi našu kardiologiju, i time doprinese što boljem statusu naše kardiološke prakse u svetu, kao i da iznese njen savremeni pristup i korak sa vremenom i novinama (Circulation). U svom poslednjem radu, objavljenom nakon poslednjeg izbora, kao koautor, potvrdio je u metanalizi da stentovi sa lekom pored pozitivnog dejstva na sprečavanje procesa restenoze nemaju i neželjen efekat veće učestalosti tromboze stenta u poređenju sa metalnim neobloženim stentovima (Chin Med J).

## **D. OCENA O REZULTATIMA NAUČNOG I ISTRAŽIVAČKOG RADA**

Za ovaj konkurs dr Biljana Obrenović-Kirćanski priložila je 408 radova: 86 in extenso (6 objavljenih u celini u inostranim časopisima indeksiranim u Current Contents-u (CC) ili Science Citation Index–u (SCI); 6 objavljenih u celini u časopisima indeksiranim u Sci.Citat.Index-u (SCI) Expanded, 7 objavljenih u celini u časopisima indeksiranim u MEDLINE-u; 37 u časopisu koji nije indeksiran u gore navedenim bazama podataka; 4 objavljena u celini u zborniku međunarodnog skupa; 26 objavljenih u celini u zborniku nacionalnog skupa), 298 izvoda (131 štampanih u zborniku međunarodnog skupa; 167 štampanih u zborniku nacionalnog skupa) i 24 poglavlja u knjigama ili monografijama. Prvi autor je 113 radova (u 16 jedini), drugi-treći autor u 133 rada, a saradnik u 162 rada. Detaljna analiza radova data je u tabeli analize radova (koja je u prilogu).

Od reizbora u zvanje vanrednog profesora do ovog konkursa dr Biljana Obrenović-Kirćanski ima 58 objavljenih radova i to: prvi autor je u 29 (u 7 jedini autor), koautor u 16, a saradnik u 13 rada.

Analiza priloženih radova dr Biljane Obrenović-Kirćanski pokazuje da je njen stručni i naučni interes bio usmeren na nekoliko problema iz oblasti kardiologije: u početku svog rada bavila se problemima hemostaze i tromboze. Radovi o ispitivanju beta tromboglobulina (koju metodu je uvela) u koronarnoj bolesti i drugim obolenjima sa predispozicijom ka tromboembolijama su prvi u jugoslovenskoj literaturi iz ove oblasti. Problemom hemostaze i tromboze kod kardioloških bolesnika nastavlja da se bavi i dalje, pa tako i najnoviji publikovani radovi su posvećeni problemima tromboze kod kardioloških bolesnika – trombozi i tromboembolijskim komplikacijama kod bolesnika sa ugrađenim veštačkim srčanim zaliscima, trombolitičkom lečenju i prevenciji tromboembolija kod ovih bolesnika. Analiza objavljenih radova ukazuje da su ciljevi jasno definisani, metodologija dobro postavljena, a dobijeni zaključci daju nova saznanja kliničarima za pravilnu procenu prognoze i lečenja ovih bolesnika. Dr Obrenović-Kirćanski je sa radovima iz ove oblasti učestvovala u radu brojnih stručnih skupova. Veći broj radova posvećen je praćenju, dijagnostikovanju i lečenju komplikacija nastalih posle kardiohirurških operacija (valvularnih srčanih mana i koronarne bolesti). U ovim radovima prisutna je interdisciplinarna povezanost kardiologa, kardiohirurga i hematologa.

Kao rezultat dugogodišnjeg bavljenja ehokardiografijom jedan broj radova je iz ove oblasti i posvećen je mogućnostima ehokardiografije u dijagnostici i praćenju srčanih obolenja; jedan broj radova se odnosi na mogućnosti ehokardiografije u dijagnostikovanju i lečenju bolesnika sa perikarditisom.

Dr Obrenović-Kirčanski se interesovala i za funkciju endotela, tj. njegovu disfunkciju, mogućnosti reverzije ove disfunkcije, o čemu svedoči jedan broj radova.

Iz dugogodišnjeg bavljenja kliničkom kardiologijom proistekli su radovi o retkim kardiološkim obolenjima (miksomima srca, š endokarditisima neuobičajene etiologije i dr.).
