Invitation Letter

Dear Professor Vesna Manojlovic,

I am glad to introduce you [The 22nd International Conference on Finite or Infinite Dimensional Complex Analysis and Applications] whose website is <http://22.icfidcaa.org>, which will be held at Dongguk University (Gyeongju) during August 8–11, 2014.

The 22 ICFIDCAA is held especially as a satellite conference of ICM 2014 in Seoul [see <http://www.icm2014.org>], whose approval status no. is **36** and code is **ChCh**.

I think you might be interested in this conference. As you might know, Gyeongju is one of the last living vestiges of ancient Korea, with a delightful blend of tradition and culture. Visitors can become time-travelers and this exceptional stay will be cherished for life.

Especially for this rare and big event 2014 ICM in Seoul, as you see the topics of my conference, a big section [Nonlinear Operator Theory in Functional Analysis] is being organized by Professor Yeol Je Cho who has held his conferences also with a large number of participants almost every two years in Korea more than 7 times, for example, the nearest one, see <http://www.gnu.ac.kr/hb/MINFAA2012/>

Department of Mathematics, Dongguk University,
Gyeongju 780-714, Korea
