Učestvovao je u izradi novog udžbenika "Interna medicina" za studente osnovnih studija, koji se nalazi u fazi objavljivanja. Takođe je svakodnevno angažovan na edukaciji lekara na specijalizaciji iz Interne medicine i užoj specijalizaciji iz Kardiologije. Kandidat je angažovan je u redovnom kliničkom radu na mestu Direktora Klinike za kardiologiju KCS, kao i Načelnika Službe za interventnu kardiologiju.

## **IZBORNI USLOVI ZA IZBOR U ZVANJE REDOVNOG PROFESORA**

#### **Angažovanost u sprovođenju složenih dijagnostičkih, terapijskih i preventivnih procedure**

Posebno se bavi interventnom kardiologijom i trenutno je zaposlen na Klinici za kardiologiju KCS na mestu Načelnika službe za invazivnu dijagnostiku i interventnu kardiologiju.

Posebno oblast njegovog interesovanja su suženja glavnog stabla i koronarnih bifurkacija, tj. račvi koronarnih arterija. Učestvovao je u timu KCS za implantaciji prvih veštačkih zalistaka na aortnoj poziciji perkutanom putem u Srbiji.

Bio je i rukovodilac radne grupe Sekretarijata za zdravstvo Gradske uprave Grada Beograda i Ministarstva zdravlja Republike Srbije za formiranje jedinstvenog regionalnog sistema zbrinjavanja bolesnika sa akutnim infarktom miokarda u centrima u kojima je dostupno lečenje primarnom perkutanom koronarnom intervencijom na teritoriji Grada Beograda, čime je omogućeno optimalno lečenje ovih bolesnika u našoj sredini.

#### **Broj i složenost složenih, dijagnostičkih, terapijskih i preventivnih procedura koje je kandidat uveo, ili je učestvovao u njihovom uvođenju**

Profesor Stanković je do sada uradio preko 15,000 perkutanih dijagnostičkih i interventnih koronarnih procedura. Inicirao je ili aktivno učestvovao u uvođenju većeg broja interventnih kardioloških metoda u Kliničkom centru Srbije, među kojima je lečenje suženja na računima koronarnih arterija na prvom mestu.

Učestvovao je takođe u uvođenju metode perkutane ugradnje koronarnih stentova u rutinsku praksu u Srbiji. Kao deo svoje doktorske disertacije, profesor Stanković uvodi u Kliniku za kardiologiju KCS primenu balona sa sečivima kao metodu lečenja fibroznih i kalcifikovanih suženja koronarnih arterija. Uveo je takođe metodu perkutanog lečenja suženja glavnog stabla leve koronarne arterije u rutinsku kliničku praksu, najpre u akutnom infarktu miokarda sa elevacijom ST segmenta, a nakon toga i u elektivnim procedurama. U toku protekle decenije intenzivno se bavio lečenjem kompleksnih suženja na računima koronarnih arterija gde je, na bazi preporuka evropskog bifurkacionog kluba, uveo u našu kardiologiju više metoda istovremene ugradnje dva koronarna stenta (Culotte, mini-Crush, DK-Crush, TAP), kao i stentova specijalno dizajniranih za ugradnju u račve krvnih sudova. Učestvovao je i u uvođenju optičke koherentne tomografije, kao vizualizacione metode u primarnim perkutanom intervencijama kod bolesnika sa akutnim infarktom miokarda.

Uveo je u Kliniku za kardiologiju KCS i perkutanu metodu renalne denervacije, kao metodu lečenja najtežih bolesnika sa arterijskom hipertenzijom koja je rezistentna na optimalnu medikamentnu terapiju.

##### **Angažovanost u sprovođenju složenih dijagnostičkih, terapijskih i preventivnih procedure**

Posebno se bavi interventnom kardiologijom i trenutno je zaposlen na Klinici za kardiologiju KCS na mestu Načelnika odeljenja za interventnu kardiologiju.

Ukupno iskustvo u preko 15,000 kateterizacionih procedura.

Posebno mesto njegovog ineteresovanja je oblast rekanalizacije hronično okludiranih koronarnih arterija. U poslednjih 6 godina uradio je više od 350 perkutanih rekanalizacija hronično okludiranih koronarnih arterija.

## ZAKLJUČNO MIŠLJENJE I PREDLOG KOMISIJE

Na konkurs za izbor 2 (dva) nastavnika u zvanje redovnog profesora za užu naučnu oblast Interna medicina (kardiologija) na Medicinskom fakultetu Univerziteta u Beogradu, od 04.09.2019. godine, javila su se 2 (dva) kandidata: dr Goran Stanković i dr Siniša Stojković, dosadašnji vanredni profesori na Kateri uže naučne oblasti Interna medicina.

Uvidom u dokumentaciju i pregledom priloženog, Komisija je konstatovala da oba kandidata ispunjavaju zakonske uslove za izbor u zvanje redovnog profesora za užu naučnu oblast Interna medicina (kardiologija).

Rezultati rada **dr Gorana Stankovića**, uzimajući u obzir najviše profesionalne i naučne standarde, predstavljaju po svemu izuzetna dostignuća, ne u domaćim, već u svetskim okvirima. Njegov ogroman, suštinski doprinos razumevanju i kontinuiranom unapređenju lečenja bolesnika sa bifurkacionim lezijama koronarnih arterija je prepoznat i visoko vrednovan u međunarodnim stručnim i naučnim krugovima. Dr Stanković je svoje znanje nesebično stavio na raspolaganje kardiolozima u našoj zemlji i, uz ogroman trud i posvećenost, omogućio im da u našoj zemlji uče od vrhunskih stručnjaka sa svih kontinenata. Takodje, dr Stanković je, okupivši oko sebe izuzetan tim mladih, talentovanih istraživača, osmislio i u našoj sredini zajedno sa njima izveo seriju istraživanja, čiji su rezultati prezentovani na elitnim međunarodnim naučnim skupovima i publikovani u časopisima najvišeg ranga. Iza visokog H-indeksa, ogromnog broja citata i zbirnog impakt faktora radova objavljenih u vrhunskim svetskim časopisima, stoji briljantan stručnjak, pedagog i naučnik, najviše međunarodne kategorije, perjanica naše kardiologije, čije brojne aktivnosti i jedinstveno delo na najbolji način promovišu našu medicinu, našu nauku i našu školu.

**Dr Siniša Stojković** je jedan od naših vodećih stručnjaka kada su u pitanju najkompleksnije perkutane koronarne intervencije, a posebno intervencije na hronično okludiranim koronarnim krvnim sudovima, koje zahtevaju izuzetnu veštinu, znanje i posvećenost. Kao briljantan operater i vrhunski edukator, dr Stojković je često pozivan da u zemlji i inostranstvu drži predavanja i demonstrira najkomplikovanije strategije i tehnike rekanalizacije hronično okludiranih koronarnih arterija, i tako, na najbolji način, predstavi mogućnosti i dostignuća naše interventne kardiologije. Dr Stojković je takodje, što je retkost i izuzetno vredno, uspeo da svoje vrhunsko znanje i iskustvo prezentuje domaćoj međunarodnoj stručnoj i naučnoj javnosti, ne samo kroz neposredno izvođenje procedura, već i kroz značajne publikacije u važnim međunarodnim časopisima, što se ogleda u visokom zbirnom impakt faktoru i citiranosti objavljenih radova.

S obzirom da se radi o vrsnim kandidatima, sa retko kvalitetnim stručnim i naučnim biografijama, koji u potpunosti ispunjavaju zakonske uslove za izbor u zvanje redovnog profesora za užu naučnu oblast Interna medicina (kardiologija), analizom biografskih podataka, naučnog, pedagoškog i stručnog rada, a na osnovu kriterijuma za izbor nastavnika i saradnika na Medicinskom fakultetu u Beogradu, Komisija jednoglasno predlaže Izbornom veću da utvrdi predlog za izbor **dr GORANA STANKOVIĆA i dr SINIŠE STOJKOVIĆA** u zvanje **REDOVNOG PROFESORA** za užu naučnu oblast **INTERNA MEDICINA (kardiologija)** na Medicinskom fakultetu Univerziteta u Beogradu.
