IZBORNI USLOVI ZA IZBOR U ZVANJE REDOVNOG PROFESORA

ZA STRUČNO-PROFESIONALNI DOPRINOS:

Angažovanost u sprovođenju složenih dijagnostičkih, terapijskih i preventivnih procedura

U toku svog dosadašnjeg rada (od 1989) u Klinici za neurohirurgiju Prof dr Joković je postao jedan od vodećih neurohirurga u zemlji koji je učestvovao u brojnim operacijama (trauma centralnog nervnog sistema, tumori mozga i kičmene modine, vaskularna patologija, kongenitalne anomalije CNS, spinalna patologija) sa posebnim interesom za delikatnu patologiju tumora velikog mozga, a posebno spororastućih tumora. Poslednje dve decenije se naročito angažovao na patologiji degenerativnih i drugih oboljenja kičme. Posebno treba istaći da je Prof dr Miloš Joković ne samo uveo stabilizacione procedure torakolumbalnog i lumbosakralnog segmenta kičme u Klinici za neurohirurgiju Kliničkog centra Srbije, već ih je za kratko vreme do te mere usavršio da je danas jedan od vodećih spinalnih hirurga u zemlji. U tom smislu završio je najviše kurseve i usavršavanja u inostranstvo, pa je pozivan i kao predavač iz te oblasti. Takođe, prvi je uveo i uradio perkutanu vertebroplastiku, kao i kompletnu korporektomiju sa veštačkim pršljenom, koja se sada rutinski primenjuje na Neurohirurškoj klinici. Prvi je incirao i uradio ugradnju baklofenske pumpe kod spasticite uzrokovanih različitim oboljenjima kičmene moždine. Organizovao i formirao timove za početak specifične terapije duboke moždane stimulacije.

U 47 radova kandidat je jedini autor, a u 139 rada prvi autor dok je u 15 radova sa JCR liste nosilac. U ostalim radovima Dr Lukas Rasulić je saradnik.

Od izbora u zvanje vanrednog profesora dr Lukas Rasulić je objavio 208 radova. Od toga 50 radova objavljeno je in extenso u časopisima sa JCR liste i 4 rada u kategoriji ostali radovi sa JCR liste (Ukupan IF 66,451).

Objavljeni stručno-naučni radovi u najvećem broju, kao i magistarska teza i doktorska disertacija obuhvataju oblast hirurgije perifernog nervnog sistema i brahijalnog pleksusa koja predstavlja područje užeg specijalističkog rada.

Sa druge strane, objavljeni stručno-naučni radovi obuhvataju i druge oblasti neurohirurgije, pre svega neurotraumatologiju, cerebrovaskularna obolenja kao i tumore centralnog nervnog sistema.

U radovima obrađena je praktično celokupna savremena neurohirurška problematika, a najveći broj radova posvećen je sledećim problemima:

1. Savremene neurohirurške i neuroradiološke dijagnostičke metode, mogućnosti primene kod različitih patoloških stanja, kao i granice njihove primenjivosti. Ovo se u prvom redu odnosi na primenu kompjuterizovane tomografije u dijagnostici traumatskih intrakranijalnih hematoma, subarahnoidalne hemoragije i cerebralnih aneurizmi. Jedan broj radova obrađuje i dijagnostiku povreda perifernog nervnog sistema, odnosno brahijalnog plexusa.
2. Ekspanzivni procesi kostiju lobanje i mozga, prvenstveno maligne prirode, mogućnosti njihovog hirurškog lečenja.
3. Vaskularna oboljenja mozga i njihove komplikacije - aneurizme intrakranijalnih krvnih sudova, savremene metode njihovog mikrohrurškog lečenja, indikacije i vreme operativnog lečenja, kao i medikamentozni tretman komplikacija.
4. Kraniocerebralne povrede, klasifikacija i faktori prognoze, konzervativni i hirurški metodi lečenja.
5. Degenerativna oboljenja lumbosakralnog dela kičmenog stuba, sa analizom vrednosti dijagnostičkih postupaka, hirurških pristupa i indikacija za hirurško lečenje.
6. Najveći broj radova je posvećen mikrohrurškom lečenju povreda i oboljenja perifernih nerava i brahijalnog plexusa u kojima su obrađene najsavremenije dijagnostičke metode i hirurški postupci u slučajevima avulzije njegovih spinalnih korenova.
7. Poslednjih godina posebno interesovanje kandidat pokazuje za funkcionalnu hirurgiju, i to hirurgiju bola, pa je određen broj radova i iz ove oblasti. Najznačajnije mesto među njima zauzimaju upravo bolna stanja nakon povreda perifernog nervnog sistema.

U analizi radova posebno se ističe rad: **Rasulic L., Savic A., Lepic M., Kovacevic V., Vitosevic F., Novakovic N., Mandic-Rajcevic S., Samardzic M. Viable C5 and proximal C6 stumps use in reconstructive surgery of the adult brachial plexus traction injuries. Neurosurgery, 2018, gde je prof. dr Lukas Rasulić nosilac rada sa IF=4,605 M21a, gde je nakon toga u časopisu "Neurosurgery" objavljen komentar: Alzahrani S., Midha R. **Commentary on: Rasulic L., Savic A., Lepic M., Kovacevic V., Vitosevic F., Novakovic N., Mandic-Rajcevic S., Samardzic M. IZBORNI USLOVI ZA IZBOR U ZVANJE REDOVNOG PROFESORA

1. STRUČNO PROFESIONALNI DOPRINOS

Angažovanost u sprovođenju složenih dijagnostičkih, terapijskih i preventivnih procedura

Dr Lukas Rasulić u svom dosadašnjem radu unapredio je na najviši nivo timski rad i povezao stručnjake istih i sličnih interesovanja iz oblasti neurohirurgije, hirurgije, vaskularne hirurgije, ortopedije, mikrohrurgije, neurologije, otorinolaringologije, maksilofacijalne hirurgije, fizikalne medicine i rehabilitacije. Rezultat svega toga je svakodnevna saradnja stručnjaka iz gore navedenih oblasti u rešavanju kompleksnih problema hirurškog i drugog lečenja pre svega iz oblasti hirurgije perifernog nervnog sistema i brahijalnog plexusa, a potom i drugih oblasti neurohirurgije kao i razvoj nastave prema aktuelnim standardima.

Najveći broj operacija je uradio na perifernim nervima i brahijalnom plexusu, koji predstavlja užu oblast njegovog interesovanja. Inače, navedena oblast predstavlja oko 5% celokupne neurohirurške patologije.

Dr Lukas Rasulic je ekspert u oblasti hirurgije perifernog nervnog sistema, koji se pored svih ostalih aspekata hirurškog lečenja povreda i obolenja perifernog nervnog sistema praktično jedini se bavi rekonstruktivnom hirurgijom kompleksnih povreda i obolenja perifernih nerava, a posebno brahijalnog plexusa. U svakodnevnoj praksi napred navedeno se sprovodi multidisciplinarnim pristupom za lečenje ovih pacijenata koji je etabliran kao zlatni standard ne samo u Srbiji nego i u Evropi odnosno svetu. Dr Lukas Rasulić je unapredio hirurgiju perifernog nervnog sistema i tokom svog rada, naročito u poslednjih pet godina je uveo u standardnu hiruršku praksu u Srbiji sledeće hirurške pristupe, tehnike i metode, koje se odnose na ovu oblast, a koje se ranije nisu izvodile u Srbiji:

1. Zadnji hirurški pristupi u lečenju povreda i obolenja brahijalnog plexusa na svim nivoima i elementima.
2. Distalni nervni transferi.

- Somsak procedura koja podrazumeva transfer grane n. radialis-a za dugu glavu m. triceps brachii na granu n. axillaris-a za prednji deo m. deltoideus-a.
- transfer spoljašnje grane n. spinalis accessorius-a na n. suprascapularis zadnjim pristupom i minimalno invazivnim prednjim pristupom.
- transfer grane n. thoracicus longus na n. suprascapularis.
- transfer grane m. musculocutaneus-a za m. brachialis na n. interosseus anterior.
- transfer grane n. interosseus posterior-a za m. supinator na n. interosseus posterior.
- transfer grane n. medianus-a za m. flexor digitorum superficialis na granu n. radialis-a za m. extensor carpi radialis brevis.
- transfer grane n. medianus-a za m. flexor carpi radialis na n. interosseus posterior.
- „dupli fascikularni transfer“ koji odrazumeva Oberlin proceduru plus transfer fascikulusa n. medianus-a za m. flexor carpi radialis na granu n. musculocutaneus-a za m. brachialis.
- transfer grane n. radialis-a za ECRB na n. interosseus anterior.
- transfer grane n. interosseus posteriora za m. supinator na granu n. medianusa za m. flexor digitorum superficialis.
- transfer grane n. ulnaris-a za m. abductor digiti minimi na granu n. medianusa za mišiće tenara.
- transfer grane n. interosseus anteriora za m. pronator quadratus na duboku motornu granu n. ulnaris-a.

3. Alotransplantacija uz upotrebu veštačkih graftova (konduita) i materijala za zaštitu suturne linije.

Dr Lukas Rasulić je isto tako izvodio i učestvovao u operacijama i iz drugih oblasti neurohirurgije (intrakranijalni tumori, aneurizme, kranio cerebralne povrede, ugradnja sistema za derivaciju likvora kod hidrocefalusa, degenerativne bolesti kičmenog stuba i tumori kičmene moždine).

Tokom rada u Institutu za neurohirurgiju, Rasulić dr Lukas je pokazao izraženu spremnost za kontinuirano usavršavanje uzimajući aktivno učešće na međunarodnih i domaćih stručno-naučnih skupova. Za člana Komisije Kliničkog centra Srbije za kontrolu i nadzor kvaliteta rada izabran je 2009. godine. U više navrata tokom 2007-2009 godine bio je vršilac dužnosti načelnika neurohirurškog B i E odeljenja Instituta za neurohirurgiju Kliničkog centra Srbije. Za načelnika B odeljenja Klinike za neurohirurgiju Kliničkog Centra Srbije izabran je 2009. godine.
