e. Recenzije

Prof dr Dejan Orlić je recenzent za nekoliko časopisa: Journal of Interventional Cardiology, Catheterization and Cardiovascular Interventions, International Journal of Cardiovascular Imaging, Indian Heart Journal, Journal of American College of Cardiology, Vojnosanitetski pregled, Circulation Cardiovascular Interventions, Frontiers in cardiovascular medicine.

F. OCENA O REZULTATIMA NAUČNOG I ISTRAŽIVAČKOG RADA

Od ukupnog broja objavljenih radova (590) kandidata Dr Dejana Orlića, 55 radova je objavljeno kao originalni radovi u časopisima sa JCR liste (ukupan IF 185,299), 5 radova su u kategoriji ostali radovi sa JCR liste (ukupan IF 25,655), 4 rada u časopisima indeksiranim u bazi podataka Medline, 7 radova u celini u časopisima koji nisu indeksirani u gore navedenim bazama, 3 rada u celini u zbornicima međunarodnih skupova, 37 radova u celini u zbornicima nacionalnih skupova, 327 izvoda u zbornicima međunarodnih skupova, 148 izvoda u zbornicima nacionalnih skupova i 4 poglavlja u udžbenicima i knjigama.

Kandidat je autor u 121 radu, a u ostalim jedan od koautora. Od poslednjeg izbora (2021. godine) kandidat je objavio 12 radova. Nekoliko originalnih radova je štampano u vrhunskim kardiološkim časopisima, kao što su Journal of American College of Cardiology i Circulation (ukupan IF 19,235). Pored visoke citiranosti (334 puta jedan rad), ovi radovi su imali direktan uticaj na svakodnevnu kliničku praksu u svetu: stentovi sa oslobađanjem leka prve generacije su oslobodili interventnu zajednicu difuznih restenoza u odnosu na period običnih metalnih stentova; veći broj stentova u više koronarnih arterija ima za posledicu lošiji klinički ishod, veća dužina stentiranog segmenta nosi i veći rizik od

akutne tromboze stenta, početna doza klopidogrela od 600 mg ostvaruje veću i bržu inhibiciju trombocita u odnosu na 300 mg, rutinska aspiracija tromba kod STEMI bolesnika nije nezavisni prediktor smanjenja mikrocirkulatorne rezistencije.

Analizom priloženih radova zapaža se interesovanje kandidata za različite oblasti kardiologije, kao što su, u početku, klinička kardiologija, farmakološka kardiologija kod bolesnika sa akutnim infarktom miokarda i primena visokih doza metoprolola intravenski kod STEMI bolesnika, a kasnije neinvazivna dijagnostika sa evaluacijom prognostičkih neelektrokardiografskih markera na testu fizičkog opterećenja kod bolesnika sa hroničnim koronarnim sindromom, i najzad, interventna kardiologija, od evaluacije efikasnosti i bezbednosti prve generacije koronarnih stentova sa oslobađanjem leka do procene uticaja aspiracije tromba na koronarnu fiziologiju kod bolesnika sa akutnim infarktom miokarda.

Kandidat u svom svakodnevnom radu daje značajan naučni, stručni i pedagoški doprinos aktivnim učesćem u osnovnoj nastavi, osnovnoj nastavi na engleskom jeziku, kao i u postdiplomskoj nastavi u okviru akademskih specijalističkih studija, specijalizacije iz opšte medicine, uže specijalizacije iz kardiologije i doktorskih studija. Zapažene su prezentacije na studentskim kongresima radova studenata kojima je bio mentor.

IZBORNI USLOVI ZA IZBOR U ZVANJE VANREDNOG PROFESORA

1. ZA STRUČNO-PROFESIONALNI DOPRINOS

Angažovanost u sprovođenju složenih dijagnostičkih, terapijskih i preventivnih procedura

Kandidat je angažovan u svakodnevnom sprovođenju složenih dijagnostičkih i terapijskih procedura kod bolesnika sa akutnim ili hroničnim koronarnim sindromom ili strukturnim bolestima srca ili terminalnom srčanom insuficijencijom u sali za kateterizacije Klinike za kardiologiju i Klinike za kardiohirurgiju, Kliničkog centra Srbije, i u salama za kateterizacije opštih bolnica u Valjevu, Užicu i Leskovcu. Šef je odseka za invazivni kardiovaskularni imidžing, u okviru kojeg se svakodnevno sprovode IVUS ili OCT kod najkompleksnijih srčanih bolesnika. Tokom godine obavi oko 480 invazivnih procedura, od čega 80 primarnih i 150 elektivnih perkutanih koronarnih intervencija. Godišnje obavi i oko 300 ambulantnih pregleda.

Broj i složenost složenih, dijagnostičkih, terapijskih i preventivnih procedura koje je kandidat uveo ili je učestvovao u njihovom izvođenju

U oblasti neinvazivne kardiologije, nakon odbrane magistarske teze, na Klinici za kardiologiju, UKCS, u kabinetu za ergometriju, neelektrokardiografski prognostički parametri kao što su hronotropna kompetencija, oporavak srčane frekvence i Duke Treadmill skor se upisuju u izveštaj za svakog bolesnika. U oblasti invazivne kardiologije, na Klinici za kardiologiju, UKCS, uveo je rotacionu aterektomiju kao invazivnu terapijsku proceduru za lečenje bolesnika sa veoma kalcifikovanim koronarnim stenozama i uspostavio kao standardnu metodu. Na Klinici za kardiologiju, UKCS, uveo je optičku koherentnu tomografiju kao invazivnu dijagnostičku metodu za karakterizaciju koronarnih stenoza radi optimizacije perkutanih koronarnih intervencija. Uradio je preko 200 pregleda intravaskularnim ultrazvukom, i za svaki pregled napravio upitnik, sa ciljem da odgovori na pitanja koja je bila indikacija za intravaskularni ultrazvuk i do kakvih promena u strategiji lečenja je dovela njegova primena u svakodnevnoj kliničkoj praksi i time napravio jedinstven registar za primenu IVUS-a. Indirektno je procenjivao otpor u infarktoj i neinfarktnim arterijama kod bolesnika sa akutnim infarktom miokarda, i na osnovu toga kvantitativno procenjivao efikasnost aspiracije tromba u smislu povećanja miokardne perfuzije u infarktnoj zoni. Prvi je u Republici Srbiji uradio perkutanu koronarnu intervenciju kod bolesnika sa izraženom slabošću srca uz podršku mehaničke mikroaksijalne pumpe. Prvi je u Republici Srbiji uspešno ugradio mehaničku mikroaksijalnu pumpu za potporu desnog srca kod bolesnika sa terminalnom srčanom insuficijencijom i LVAD-om.
